

ERP Reimagined

with Business Intelligence

Focus I is a revolutionary product that combines business intelligence (BI) tools with traditional ERP implementations enabling users to run statistical models, analyze data, extract, and generate business intelligence reports on the go.

## BENEFITS

### Empowers Executives:

- Monitor business activities to ensure best performance
- Cost effective tool to help decision-making in real time
- Improve responsiveness to activities that impact your business

### Increased Flexibility:

- Combine multiple reports from different Modules
- Get quick view of your business even on the move on Executive Dashboard

### Better Return on Investment:

- Built in Business Intelligence Tools for Business Growth Analysis
- Reporting capabilities eliminate the need for a separate reporting tool

## KEY FEATURES

- Multiple options to access on the move
- Integrated Business Intelligence
- Enhanced reporting capabilities
- Accessibility of dashboard on mobile device
- User definable reports
- KPI (Key Performance Indicator) definition
- Alerts - customized as per user's requirements
