

# HOSPITAL MANAGEMENT MADE EASY.

CLOUD ENABLED

IPAD/ANDROID READY

CUSTOMIZABLE EMR

ELECTRONIC CLAIMS

## ABOUT INSTA HEALTH SOLUTIONS

Insta Health is one of the most trusted and recognised hospital management and EMR software solution provider in the health care sector. We provide cloud based and local server based solutions to hospitals and clinics to automate their key processes - clinical, financial, operational and management. Our mission is to improve productivity and efficiency of doctors and hospitals across the world by providing products and solutions by using latest technologies.

## INSTA HMS - EXCLUSIVE FEATURES

### ADVANCED AND CUSTOMIZABLE EMR

Now you can build a truly paperless OPD and IPD with clinical records for departments. The EMR View Module provides unified view of all the clinical information in one easy-to-view screen based on dates or type of documents.

### ELECTRONIC CLAIMS

Advanced Insurance Module enables e-claims for insurance processing. It helps collect clinical data such as - ICD codes, E&M codes, LOINC codes, Tobacco Usage that enable faster insurance processing. DRG based claims are possible too. If e-claims are not implemented, there is facility to receive the remittance details of insurance companies in Excel format for automatic reconciliation.

### FASTEST HMS IMPLEMENTATION GUARANTEE

With its unique features like excel based master data collection, faster customisation, custom reports, templates, clutter free screens etc., Insta HMS reduces the implementation time drastically. Being a browser based tool, it's not necessary to load any software on individual desktops, thus making implementation fast and easy.

### EASIEST TO USE AND LEARN

Hospitals constantly struggle with high staff turnover. With Insta HMS, you can be rest assured your new employees would begin utilising the tool within a short time frame. Insta HMS offers friendly features like single screen input, clear actions with every screen, reduced complexity, capability to open multiple screens and more.

### LOWER TOTAL COST OF OWNERSHIP

Insta HMS is built on Linux OS using PostgreSQL Database. Both do not require any software licenses. Since Linux is not prone to viruses, the need for anti-virus is also reduced. You can use basic Windows Desktops for user access.

### FASTER MAINTENANCE AND UPGRADES

Insta HMS is deployed remotely using internet on your local server. Our technical team need not visit your facility for upgrades or maintenance. We can guide your team virtually, using tools like Team Viewer. We also provide optional remote data back up service and four hour complaint response time for critical issues.

### SECURITY THROUGH DIGITAL CERTIFICATES

Insta HMS uses very high security features for accessing the system from outside the hospital using digital certificates. It's the same technology that banks use for their corporate accounts.

## END-TO-END HOSPITAL MANAGEMENT MODULES

### OP MODULES

Reception (Help desk), Registration, Appointment Scheduler, OP Consultations and Prescription, OP Billing, Insurance management, E Claims, Emergency management.

### IP MODULES

Admission, Discharge and Transfer, IP scheduler, OT scheduler, Bed management, IP and OT services, IP billing, Insurance management, E claims, Package management, Ward information system, ICU management, Discharge summary.

### SUPPORT MODULES

Phlebotomy, Laboratory, Radiology, OP pharmacy, IP pharmacy, Medical Records Management, Diet and Nutrition, F&B, Linen and laundry, Ambulatory management, Asset management, Biomedical equipment management, Maintenance and contracts management, Blood bank, CSSD.

### ADMIN MODULES

Inventory management, Purchase management, Doctors payments, Housekeeping, HR & payroll (through ERP Interface), Financial accounting (through ERP interface), User management (security and identity management), Master data management, MIS, Dashboard.

### ELECTRONIC MEDICAL RECORDS

EMR view, Generic & Specialty OP consultation / IP consultation, Vitals, Intake-Output, Anaesthesiology information, Drug delivery charts, Progress notes, Nurse notes, OT notes and reports, ICD codes, Uploading scanned documents, Vitals & Lab result analytics, Patient portal, Case file tracking, General medical records like Birth Certificates, Accessing clinical records by iPad and Tablets.

## BUSINESS INTELLIGENCE

With the amount of diverse data that hospital management needs to monitor, regular 'reports' based management will not be enough. Hospitals need easier ways of spotting trends, identifying exceptions and to look deeper into data for improvement in their performance. Our Business Intelligence Module uses Third Party BI Tool, which is connected to the HMS database directly and data is extracted into the private store of the BI tool. Therefore, you will always get intelligence on the latest data.

### ADVANTAGES OF BUSINESS INTELLIGENCE

- ▶ Queries and reports – anytime, anyform with variety of filters and groups.
- ▶ Understand trends and drill down on exceptions.
- ▶ Dashboards on hospital performance with excellent tools for visualisation and presentation.

## MULTI-CENTER OPERATIONS

Insta HMS is one of the very few solutions available in the market that completely supports multi-centre operations with flexibility that a local server based system gives. All the centres can be run with a single server. The users can be defined based on centres and so they can work only for the patients of their centres. Patients can get treatment from any centre. All the stores, cash counters, equipments can be shown as belonging to specific centres allowing for easy control and reporting. Scheduling of patients can be done across the centres or for individual centres. The central server can be in private or public cloud.

## CUSTOMER BASE

Insta Health Solutions has a customer base of over 150 hospitals and clinics in India and the Middle East. Over 16 hospitals in the Middle East have endorsed our product and we are starting implementations in Malaysia and Africa.
